

3D shapes – nets

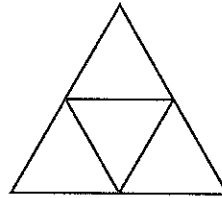

A net is the pattern of a 3D shape, unfolded and laid flat. It helps to visualise how nets fold up to create a 3D shape.

1 Fold each net 'in your head' then write its letter in the correct shape name box at the bottom of the page:

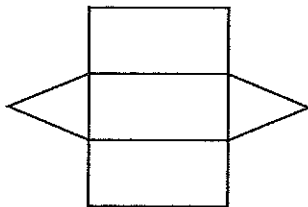

a

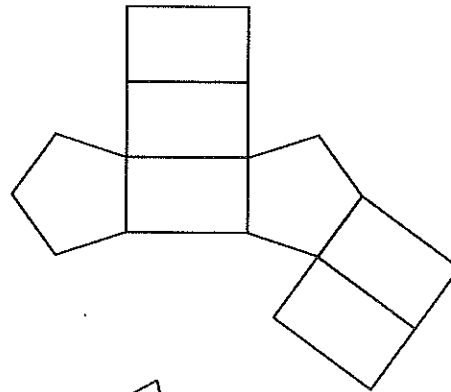

b

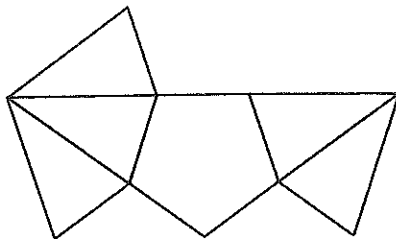

c

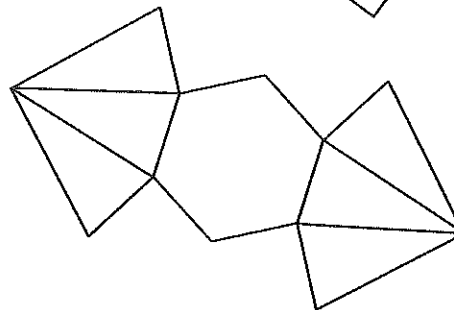

d

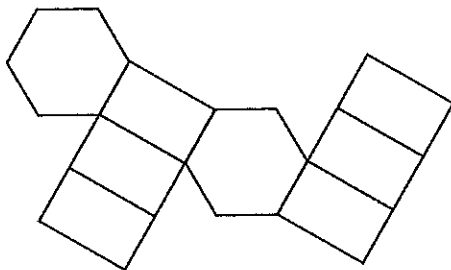

e

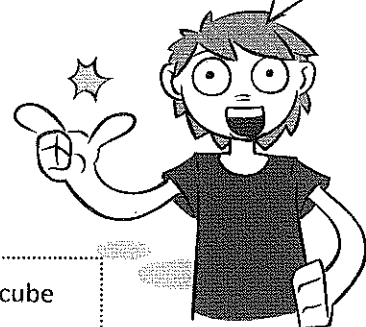

f

g

Remember the difference between prisms and pyramids!

REMEMBER

pentagonal pyramid

triangular pyramid

hexagonal prism

triangular prism

pentagonal prism

hexagonal pyramid
